Review of the F3 to M7 Corridor Selection
PO Box 593
CANBERRA ACT 2601

Dear Sirs

I have received a flyer in my letterbox reading

"Next Toll-way disaster F3 to M2/M7 Link

Do you want a tunnel ventilation stack in front of your house?"

MY ANSWER TO THAT IS DEFINITELY NO

From this flyer I understand that the cost estimate contains an item "Fan room excavation" for 68 million dollars but the study does not tell where the stacks will be located and does not commit to filters. .

I am writing to ask that you please commit to filters RIGHT NOW (in the planning stages), and before any work is commenced as we, in this area, do not want to have pollution widely spread over our residential area as is happening, I believe, from a stack on the M5.

Do politicians want to live near stacks?. I'll bet they don't. Along the Lane Cove Tunnel residents have fought against stacks and for filters for years.

So before any decisions are made, I believe you have a duty of care to the residents of this area (and future generations) to commit to filters right now.

Let's get it right this time!!!!

Yours faithfully
