Comment: I do hope you are able to at least continue to allow this service to operate, and hopefully expand to other areas. I am aware that some people have voiced concerns with noise and privacy etc, but I have absolutely no problem with their operations. From my perspective, these drones make a small amount of noise for a short time at intermittent periods on some days; hardly an inconvenience! I have no problem whatsoever welcoming the continued advancement of these technologies, which are reducing congestion and pollution on our increasingly busy roads.
