Thank you for your email - its much appreciated.

I note that you have cc'd the Minister in on your message but I certainly will continue to discuss the benefits of Inland Rail with him, at the same time as stressing the potential economic, environmental and social impacts the alternative corridor options across the Darling Downs that he must consider.

I will also emphasise to him your view, which I note is shared by many others, that a corridor decision should be finalised as soon as possible.

Best regards,

John

Good morning

Thank you for your email.

The Melbourne to Brisbane Inland Rail project has been discussed for well over 100 years. During the last decade investigations under successive federal governments have ramped up and over the last twelve months, detailed consideration of four potential corridors across the Darling Downs has been under taken. This has involved a Project Reference Group with local community membership, range of public meetings and comprehensive media coverage.

I am not aware of there having ever been any specific plan whatsoever for a direct link to Beef City.

As outlined in today’s Chronicle newspaper, Minister Darren Chester will announce the preferred corridor as being via the Millmerran, Pittsworth, Wellcamp and Charlton areas. Please see the link below. This corridor does not include the Purrawunda area.

Best regards,

John
