ACT 2601

The department proudly acknowledges the Traditional Owners and Custodians of Australia, and their continuing connections to the land, waters and communities. We pay our respects to them and to their Elders past, present and emerging.

OFFICIAL
Dear Mayors/Councillors

I am writing to seek your assistance in fast-tracking the delivery of land transport infrastructure projects on local roads.

Fast-tracking the delivery of critical road projects across Australia is key to driving jobs, strengthening the economy and getting people home sooner and safer.

Through the Infrastructure Investment Program, the Australian Government assists local governments to upgrade local roads, bridges and intersections. These investments, including through the Roads to Recovery Program, are critical to improving the safety and efficiency of local roads, and contributes to the prosperity and wellbeing of local economies.

I am seeking your assistance in the identification of any Australian Government land transport infrastructure projects for which construction could commence or be brought forward in the next three to six months. This could include new or existing projects with, or that would qualify for, Australian Government contribution. I would appreciate receiving your response in the attached template by 20 March 2020 through my Department at IIP@infrastructure.gov.au. The government will communicate the outcome of the process in due course.

I look forward to continuing to work closely with you to deliver infrastructure needed to ensure the ongoing stable contribution to the Australian economy.

Yours sincerely

Michael McCormack

OFFICIAL

Dear Majors/Councillors

We have received several emails seeking additional information to assist in preparing a response to the Deputy Prime Minister’s letter.

We hope the following advice will assist you in responding:

- This process is only to obtain an early indication from Councils on which projects could be bought forward should funding become available.

- Projects could include either new or existing projects that are planned to commence shortly. Where existing projects already received an Australian Government contribution, please identify this in your response.

- Projects must be able to commence construction within three to six months.

- Projects must be land transport infrastructure projects eligible for funding under the Australian Government’s Infrastructure Investment Program (IIP).

- Supporting information on projects is not required at this stage.

- There is no limit on the funding ratio for projects, however the Australian Government’s preference is to jointly fund projects with Councils.

We trust this information is of assistance.

Dear Mayors/Councillors

I am following up on the Deputy Prime Minister’s letter of 6 March seeking information on local road projects that have the potential to be fast-tracked to support local economies recover from the impact of COVID-19. Information to assist with Council’s response was circulated on 12 March. I have attached copies of these emails for your information.

We recognise that some Councils may not have been in a position to respond to the Deputy Prime Minister’s letter due to disruptions caused by COVID-19, as well as drought and bushfire recovery efforts.

To enable Councils adequate time to consider and respond to the request, the deadline for responses has been extended until Wednesday 8 April. Please use the attached word document template to submit your project
nominations to IIP@infrastructure.gov.au. If you are unable to make a submission by the deadline, this does not exclude you from potential outcomes of this process with equity being an important factor in decision making.

At this stage we are only seeking to obtain an early indication of potential projects that could be fast-tracked within the next six months. We will contact all Councils again over coming weeks.

Regards

Department of Infrastructure, Transport, Regional Development and Communications.
