Relevant: Jervis Bay Territory residents – Village Road

Topic: Geotechnical Investigation – map location attached

Notice of upcoming investigation works

As part of investigations for the National Broadband Network (NBN), there will be some upcoming roadside geotechnical investigations, requiring short-term traffic management measures, taking place in the Jervis Bay Territory (JBT).

The investigative works will be undertaken across six shallow boreholes along roadsides and verges of Village Road and Jervis Bay Road within the Jervis Bay Territory, as well as within Jervis Bay Range Facility and HMAS Creswell.

They will take place during the week commencing 19 January 2026, with all works occurring in this period on weekdays between 7 am – 5 pm.

An excavator will be used to dig the boreholes and there will be partial road closures (one lane closed for a buffer around the borehole locations) during investigations, with traffic management controls in place for the safety of workers and drivers.

All disturbed areas will be stabilised upon completion of the works and no stockpiles will be left overnight.

We thank the community and visitors for their patience and understanding during this short period.
