

Questions asked during RVSA Industry Webinar #32 on 30 May 2024	Score	Response
Is there any guidance material related to the RVD, providing the definitions for the various options? for example Motive Power = Electric vs. Battery Only?	0	We will draft additional guidance in July 2024 for road vehicle descriptors, including definitions for the options of motive power.
Can RVD's and guidance be updated to better accommodate multiple EV motors?	0	If you have experienced an issue with vehicle registration due to the definition of motive power or have a suggestion on how Road Vehicle Descriptors could better accommodate multiple motors in electric vehicles, please email RVSAPolicy@infrastructure.gov.au
Current CI form for ADR 79/04 includes the ability to enter emissions data to support GVG, is this facility retained in the new system?	0	All compliance information forms will be generic in the rebuilt ROVER portal, including for Australian Design Rules 74/04 and 81.
Is there development for ADR81 to add Fuel Consumption and CO2 to the CI Form to support GVG data validation?	0	If you are seeking a GVG rating after the rebuilt portal goes live on 12 June, please add a comment and supporting evidence in the 'Comments and any other matters' section of the application. Read the ROVER Portal Rebuild: <i>What's new? What's different? guide</i> for more information. Search for 'ROVER Portal Rebuild' on the department's website.
Is the ROVER team ever going to try and improve their response times?	0	If you have an enquiry, our call centre should be the first point of contact as this is the most effective way to contact the department. The call centre staff ensure the high volume of enquiries we receive are allocated to the appropriate areas and generally respond to enquiries quickly.
