

**Did you know Electromagnetic Energy (EME)
is all around us and has been for a long time?
It is emitted by all these sources.**

EME is one of the most researched types of energy in the world.

The scientific evidence shows that the radio frequency EME emitted from your mobile and wireless devices is not harmful to humans or the environment. When operated within regulated limits, telecommunications infrastructure poses no harm to human health.

That's why you can use your devices and trust in the science of safe connection.
