Vehicle information

Make: MCLAREN

Model: P14

Model code: P14

Is Model Code Not applicable

Vehicle category: MA - Passenger Vehicle

Is this application for all variants of this model All

Variants

Variant Name Elva

Variant Details

4.0L V8 Roadster

Typical Vehicle Identification Number(VIN)

SBM26ACD##W#####

Is VIN unknown

Build Date Range

Start

End

November 2021

No end date

Vehicle availability

Have at least three months passed since the vehicle was first available to consumers in any market?

Yes

Has the vehicle ever been available in Australia?

Yes

Are you the holder of the approval, or authorised in writing by the holder of the approval, under which the vehicle was available in Australia?

Yes, I am the approval holder, or have permission from the approval holder

Please upload or explain in the textbox below, either:

- Your type approval or your support from the approval holder for the vehicle to be entered onto the SEVs Register, or
- Information showing that the vehicle is not/has not been genuinely available in Australia during a time that it was available elsewhere in the world
- Information demonstrating how the variants of the make and model of the vehicle are significantly different to any variant of the make or model of the vehicle that is genuinely available in the Australian market (if applicable).

The Elva was previously approved in August 2020 under MVSA Approval No. 48472 as a variant of the "P14" model, but as of November 2021, is no longer available in Australia as it does not comply with the requirements of ADR 85 (Pole Side Impact Performance).

Specific criteria for entry onto the SEVs Register

Performance Criterion is selected

Performance criterion

What is the manufacturer's nominal net engine power of the vehicle (kW)?

599.00

What is the tare mass of the vehicle (tonnes)?

1928.00

Please provide supporting material of the power to weight ratio of all applicable variants under this application.

Net Engine Power certified according to UNECE Regulation 85.

Values can be found in the existing RVD entry:

https://rvcs.infrastructure.gov.au/perl/048472_1393075_RVD_08Feb2021143054.cmd

Please provide any further information to support your application for an entry on the SEVs Register with the performance criterion.

Values can be found in the existing RVD entry:

https://rvcs.infrastructure.gov.au/perl/048472_1393075_RVD_08Feb2021143054.cmd

Declarations

I declare that the information I have provided is true, complete and accurate, and that I have not omitted any matter or thing from this application without which it would be misleading in any material particular.

I understand that under section 126 of the Road Vehicle Standards Rules 2019 (the Rules), the Secretary may request further information to support this application.

I understand that the Secretary may refuse to consider this application if:

- I do not comply with a request made under section 126 of the Rules
- the application is not accompanied by the documents specified as required in the application and the application fee

I understand that it is a contravention under:

- section 32 of the Road Vehicle Standards Act 2018 to provide false or misleading information

I, being the applicant, or the person authorised to make the declaration on behalf of the applicant, agree to the above and by checking this box, I acknowledge that I am signing this declaration.

Good afternoon,

Even though SEVs does not look at compliance, we noticed that you have applied for the performance criteria. Getting on the SEVs register is only the 1st part of the process. You will then be required to develop a model report showing compliance to each applicable ADR. Pole side impact ADR 85/00 has no exemptions and would require full compliance.

The only way that you can get exemptions for ADR 85/00 would be to apply under the Rarity criteria for SEVs which exempts destructive testing of the vehicle.

To meet the SEVs rarity criteria you would need to provide documented evidence on numbers of vehicles provided as below.

Rarity The rarity criterion requires any 1 of the following:

- less than 3,000 vehicles of the make and vehicle category of the road vehicle are produced per year (averaged over the number of years that the make of the road vehicle is, or was, available as a new vehicle in any market in the world)
- less than 1,000 vehicles of the model of the road vehicle are produced per year (averaged over the number of years that the model of the road vehicle is, or was, available as a new vehicle in any market in the world)
- less than 100 vehicles of the variant of the model of the road vehicle are produced per year (averaged over the number of years that the variant of the road vehicle is, or was, available as a new vehicle in any market in the world).

Note: Vehicles under the rarity criterion do not need to be converted to right-hand drive before they can be provided to the market, though such vehicles will still be subject to state and territory registration requirements.

some links to refer to are the model reports determinations sections 10, 17 and 21 [Road Vehicle Standards \(Model Reports\) Determination 2021 \(legislation.gov.au\)](#)

SEVs external guidance material link [Guide to specialist and enthusiast vehicles | Department of Infrastructure, Transport, Regional Development and Communications, Australian Government](#)

If you decide that you wish to proceed with the SEVs application, the vehicle does meet the criteris, i am just trying save you road blocks when you submit your model report.

Please advise?

RFI Question: RFI-SEV-2022-0000736-1 -1

Answer Text

Dear Sir/Madam,

Thank you very much for your feedback on our SEVS application for the Elva model variant. Your guidance on the eligibility criteria is much appreciated.

In this case it would be appropriate to update the SEVS application to use the rarity criterion, for which the Elva is eligible. Please find a declaration confirming the production values to support this

Full text from RFI Response

Dear Sir/Madam,

Thank you very much for your feedback on our SEVS application for the Elva model variant. Your guidance on the eligibility criteria is much appreciated.

In this case it would be appropriate to update the SEVS application to use the rarity criterion, for which the Elva is eligible. Please find a declaration confirming the production values to support this criterion attached to this response.

I loaded the SEVS application again but it seems I cannot make any changes. Are you able to update the application on our behalf to use a different criterion, or alternatively unlock the application such that I can make the changes?

Kind regards,

Notice of addition to the Specialist and Enthusiast Vehicles (SEVs) Register

I, s22(1)(a)(ii) have decided to enter the below listed vehicle/s onto the SEVs Register under section 138 of the Road Vehicle Standards Rules 2019 (the Rules). This decision has been made on the basis that I am satisfied that the vehicle/s, including listed variant/s, meet/s the criteria for entry onto the SEVs Register as set out in section 129 of the Rules.

List of entries made on the SEVs Register

SEVs Register entry number	Vehicle details (Make/Model/Variant)	Build date range	Criterion	Expiry date
SEV-000316	MCLAREN/P14/Elva	1/11/2021	Performance Criterion	26/06/2025
