

My name is Catherine Taylor. You have my permission for public submission with only my name but not my personal details [REDACTED]

Below is my submission to prevent “representatives working for this government agency. ACMA or any government body or corporation, deciding what is “Misinformation or Disinformation” on Social Media Platforms, then censoring them. By doing so, removing healthy debate and other viewpoints.

I reject strongly that ACMA would even consider this censorship, to formulate a bill to present to Parliament disavowing our free speech rights as a human being.

Choosing for me and others what we can hear or say or see on social media is an affront to our sovereignty to choose for myself and be responsible for my choices, not including what is already restricted by ACMA and Law enforcement. Fundamentally people have human frailties, opinions and structured beliefs that interpret what is “misinformation or disinformation.” This decision to decide for us would be an Orwellian trajectory. ACMA would be seen to be moving towards a totalitarian stance. The irony is that such power in a few persons hands:

- A) Has been proved in the past two or more years, classified as “Misinformation and Disinformation dictates, totally incorrect. The Mis or Dis information came instead via Government implemented or social media “fact checkers”, guardians of the gate. [REDACTED] using his FB has admitted to this collaboration with Government. The “Safe and Effective” vaccine mantra, spouted by the Government and Mains Stream Media has been called out. Now both are back peddling to reduce the horrendous implications this censorship has caused, impacting our health, our communities and businesses. Opposing or dissenting views once removed from social media, are being reinstated. Truth will out but the damage is done.
- B) Then there is the discrimination or Hypocrisy “so in your face” that it is laughable and demeaning to its citizens”: The Government is exempting itself from such censorship on Social Media Platforms. What members of Government states is factual would not or cannot be” Misinformation or Disinformation”. This intended ACMA bill will not apply to our government We have the Fox guarding the Hen House. One law for us, another for them.
- C) The slide may continue, Next: what we say is viewed as “Misinformation, Disinformation “ Spies, our neighbours, family are rewarded for telling on us. Enforcement or punishments employed i.e freezing our bank accounts, like the truckers in Canada and the people who gave them food. This happened, is a fact and not as MSM says a fabrication. One step closer is happening now.

ACMA please see this for what it is a flawed and possibly dangerous aberration of power becoming the gate keepers for all Social Media platforms under the cover of this intended Bill.

It is not on my behalf or “We the People’s” behalf but is driven by your appointees requesting this. Uphold our freedom to discern for ourselves what is truth. What is even worse there is no avenue or way to claw our freedom to choose information back should you put this Bill forward and it is passed.
