

The government cannot be trusted to be the arbiter of misinformation and disinformation due to the obvious misinformation campaign that was carried out by the government and its propaganda media accomplices.

If the general public were allowed to find out the truth about COVID-19 and the bio weapon vaccines through doing their own diligent research and reaching their own conclusions that made sense to them, instead of sifting through heaps of possible misinformation and disinformation that was put out by the government and the media, then less lives would have been lost to the side effects of the bio weapon vaccine.

I chose to do my own world-wide research and found that the media and government, were putting out a false narrative in an attempt to coerce the general public to take the bio weapon vaccine, everything that I researched was opposed the governments narrative was and everything I researched has subsequently come out in the international media as being correct and proving that the governments and medias narrative was all a lie.

The government's covid19 narrative ended up being totally false. COVID-19 is not a virus and was never isolated and proven to be a virus. The Covid19 vaccines and all booster vaccines are bio weapons and the government, media and medical fraternity are all guilty of crimes against humanity as they have blood on their hands as they all played a part in the deaths of all the innocent people who have died from the vaccine and/or medical treatments in the hospitals.

The general public and patients were deliberately denied access to medications such as Ivermectin and Hydroxychloroquine, both of which have been proven to cure flu like illnesses.

The government has proven that it is incompetent, corrupt and is not trustworthy with such power over any type of media, especially since it was deliberately lying to the Australian people.

The government banned the use of Ivermectin and Hydroxychloroquine as an early treatment, which have both been proven to work when used in early treatment. There was a deliberate attempt by the governments, both State and Federal to coerce and force people to take an experimental bio weapon vaccine.

There is no excuse for this type of evil tyranny and all people involved in the manufacture of the bio weapon vaccine or the coercion to take the vaccine, or the people administering the vaccination to people all need to be held accountable for their crimes against humanity and these crimes need to be done in Nuremberg where the government cannot hide the evidence or put suppression orders in place to protect themselves or their accomplices.

The government's own website it was noted that there has been a + 16% rise in the mortality rate. The federal government did not even try to investigate this issue but to rather try and cover it up or blame the mandates on business owners.

Not one politician, health professional or police officer carried out any type of risk assessments to determine if the vaccine was safe to be used in the first place yet they were quick to put pressure on business owners to force their staff to be vaccinated.

The government broke all its own workplace health and safety legislation and played a huge part in many businesses closing down forever.

The last thing anyone would want is for these same incompetent people in government to have control over our thoughts and free speech and media, especially when the government has proven to the Australian people that it cannot be trusted with the truth.

All the misinformation and disinformation came from the politicians, government and media and they were supposed to be the arbiters of truth. None the politicians, media, medical fraternity and constabulary can be trusted

It is for these exact reasons that I do not agree that the government should have any say over our freedom of speech.

The worst part of the proposed legislation is that the government the media and universities will be exempt from any of these proposed new laws, which ludicrous as none of these institutions can be trusted.
