How the world was conned
The Final Delusion, Part 1

Pfizer knew their vaccine would kill

Leaked data shows shocking number of fatalities and side effects now officially associated with covid shots

THE documents were leaked due to a cyber attack on the European Medicines Agency (EMA) website. More than 40 pages of classified information from the agency's system were published on the dark web, and several governments including the UK and France were notified of the leak by intelligence agencies.

The documents have proved to be shocking due to the sheer amount of side effects that are now officially associated with the 'vaccine'. Most alarming, there were at least 1,211 deaths reported in the first 28 days following the shot.

The U.S. Food and Drug Administration (FDA) had previously agreed to withhold the documents and their shocking revelations from the public for 75 years.
