I fly both Paragliders and Paramotors in the vicinity of Ballina Airport but outside the MBA. It is crazy that I can not use a portable ADS-B (Sky Echo). This would be a massive benefit to my safety and other airspace users.

CASA need as a matter of priority to allow ADS-B's to be purchased and the hexadecimal code be linked with the pilot. We should be also eligible for the rebate program.

I know many pilots that would take this up.

THIS CAN ONLY IMPROVE SAFETY..

This needs to be implemented ASAP.
