

Noise Action Plan for Brisbane: Program Governance

Airservices Australia

Executive Steering Group (ESG)

Deputy CEO, Chief Airspace & Networks Officer, Chief Aerodromes Officer, Chief Risk Noise & Environment Officer, Chief Customer & External Relations Officer
Makes final decisions and endorses progression of airspace and flight path changes

Joint Implementation Group (JIG)

Airservices' senior managers accountable for functional areas
Validates design decisions and makes recommendations to the ESG

Program Management Office

Multidisciplinary leadership personnel from BAC and Airservices
Coordinates planning, reporting, risks and delivery across the program and presents change proposals to the JIG for recommendation and decision making

Technical & Delivery Working Groups

SMEs across a range of functional areas
Develop and refine flight path change proposals, including safety, operational, environmental, community and industry considerations (additional capacity provided by consultants where required, eg Trax International)

External / advisory inputs

Brisbane Airport Community Airspace Advisory Board (AAB)

Independent community consultation and advisory body

Independent Technical Advisor (Think Research)

Provide independent review assurance services
