

## ESA SUBMISSION TO ToE REVIEW

Att: Ian Sheldon,

Thank you for the opportunity to comment.

Education Services Australia (ESA) as the provider of registrar services for the .edu.au name space supports the proposed Terms of Endorsement, and their acknowledging the importance of the .au country code top-level domain. We look forward to working with auDA and our stakeholders to ensure .au continues to enjoy the trust and confidence of the Australian public, and continues to operate, develop and grow, and be regulated in its interests.

ESA believes that the importance of consultation and consideration of stakeholder views, cannot be understated. Registrant engagement, stakeholder consultation and a representative advisory committee has been key to helping shape the edu.au name space. As a space both for and shaped by the Australian education and training sector (government and independent alike) it has been key to the enduring principles and ability to adapt to change that ensures its integrity, benefits and utility.

Best regards

**Jenny McCloy**
