Subject: AVIATION WHITE PAPER TOR INPUT

To who it may concern

I provide the following input to the Aviation White Paper Terms of Reference

The TOR should address the

- regulatory capture of air services australia so as to protect communities against unreasonable levels of aircraft noise and noise abatement is given the required level of importance when designing flight paths
-
- A review of the current noise regulation (currently no limit) for the health and well being of communities
-
- Scrutiny of project EIS's needs improving,
-
- Community Consultation has failed over and over again and needs to be taken seriously overhaul required
-
- the independence of the ANO office needs to be reviewed and should be removed from under Air Services

Regards
