**Relevant:** Christmas Island and Cocos (Keeling) Islands

**Topic:** IOT COVID-19 Weekly Update – 21 December to 27 December 2022

	Christmas Island	Cocos (Keeling) Islands
<b>New Cases: (week)</b>	<b>19</b>	<b>0</b>
<b>Total Recovered Cases:</b>	<b>624</b>	<b>374</b>
<b>Cases in Hospital</b>	<b>0</b>	<b>0</b>

COVID-19 is present in the community and Australia is experiencing another wave of cases. While the festive season is a time to be with family and friends, please take extra care to prevent spreading COVID-19. If you are experiencing symptoms it is strongly recommended that you avoid socialising and stay home to protect the community. Continue maintaining a safe distance from others and hold gatherings outdoors if possible. Practise good hand hygiene, wear a mask in public places, cover your coughs and sneezes, stay home if sick and get tested if you develop symptoms or have been in contact with someone recently infected with COVID-19.

The recommended time frame for confirmed COVID cases is five days or while your symptoms remain. So, if symptoms last longer, please stay away from others until your symptoms clear. Following infection, you should wear a mask in public for another week.

People may still test positive on a RAT following infection - this is referred to as viral shedding – you are no longer infectious once symptoms have gone.

Cases and close contacts will also be advised to stay away from the health service for seven days if they test positive – phone consultations can be offered as needed. In the event of a medical emergency, if you are COVID-19 positive, please inform the Health Service prior (if possible), or on arrival, to ensure additional protective infection control measures can be taken. IOTHS will continue to implement COVID controls and measures at the health service to protect staff and patients.

COVID-19 is a notifiable disease. Please register all cases with IOTHS not WA. Contact the health service if you require further information.
