

**Short comment**

As a resident of Algester, I strongly oppose the current proposed route of the inland rail through my peaceful, family oriented suburb. The reasons for my objections are many.....mental, physical, and emotional. I am not alone in my fear if my suburb being destroyed.. Many schools, sporting and recreational parks AND aged care facilities are close to the actual rail track...literally metres away! Who wants monstrously long, double stacked trains going past 24 hours of the day.

The glaring issue with the current route is that the Acacia Ridge Rail yard is 37 kms from the port of Brisbane. This means 1000's of trucks needed along an already heavily congested main road ( Beaudesert Road) ... and again, more disruption to residential areas with massive truck movements. Please reconsider the route. It could be stopped at Toowoomba.
