

## On Farm Connectivity Program Round 3 – Public Consultation

Hello I have participated in the first 2 rounds of the program and believe it offers a very good opportunity to integrate additional technology onto the farm, my only negative is that with the technology I invested in which was the [REDACTED] cameras a significant amount of the grant money went towards there travel, accommodation and installation which was not well documented and I believe open to being exploited, if they quote 2 or 3 day installation on both rounds they completed the install and fast as possible and were gone well before the quoted time. This means that they are exploiting the grant in my opinion.

Happy to discuss further
