

On Farm Connectivity Program Round 3 – Public Consultation

Solar Camera Systems that provide a monitoring surveillance for our farmers should be on the equipment list for Round 3, not deleted. The strong increased demand for our farmers to ensure their machinery, livestock and properties is protected is a top priority for them.

Since 2020, all farmers will agree the increase in theft and trespassing on their properties has skyrocketed and become a huge issue around our country. Farmers want support from the government with real and current issues, top class cameras with long range performance that can operate on solar is one of them.
