**Consultation name:** Review of Domestic Commercial Vessel Safety Legislation—Phase 2—  
Costs and Charging Arrangements

## Response:

Q4 and 5. As a commercial fishing crab fishing vessel under 6mtrs working in Moreton Bay and a sole operator any extra cost's involved would put extreme hardship on my business.

Q6. As small business operator and sole operator the financial aspect of cost of survey and upgrading a vessel would be prohibitive, there is not enough income in my business to support another crew member.

Q6, 7 and 8. Each individual vessel that is classified under the grandfather clause should have its survey continued on its own merits and how well maintained it is.
