2021 Regional Telecommunications Review

As a director of a transport company in Maroota, it is very frustrating running a business with the current services and poor mobile phone coverage offered by telecommunications companies.

Mobile service is very poor in areas and can be no existent in others. Calls are constantly dropping out and calls failing mid conversation. It is difficult in these instances to communicate with customers, suppliers and staff alike. I am also a member of the Rural Fire Service and these issues can cause significant delays when responding and attending emergency callouts.

Your time in this matter is much appreciated.

Kind Regards

David Camilleri
