**Sensitivity:** Normal

---

Dear Sir/Madam,

My name is Peter Clements and for the first time ever, I am complaining about the proposed changes to CASR Part 132.055 in regard to noise and Warbird operations.

In my view this is ridiculous. The small amount of warbirds, the living history they bring, the education and overall benefit the Australian public obtain is huge. These aircraft have been approved for years, the noise does not change, having to do biannual renewals is bureaucracy gone wrong.

You don't require it from historic cars or motor bikes. Think of seat belts, they aren't even required for old cars. Common sense must prevail!

I look forward to a logical resolution to this very important issue to many Australians.

Yours Sincerely  
Peter Clements
