Comment: I live in Harrison, ACT, which is a suburb serviced by the Wing trial. I have used the delivery service several times and have found it to be fast and efficient. I have also seen the RPAs flying around the area on a number of occasions. At all times I have found the noise to be minimal; comparable to a normal car, and far quieter than a delivery truck. There are a number of accepted transport options that are louder and create more disturbance than RPA (motorbikes/cars with loud exhausts). I am fully supportive of expanding the service.
