To: Noise Regulation

Subject: No Drones

Sensitivity: High

To Whom It May Concern:

We live on [REDACTED] Crace. We are in a direct flight path of all drones coming into Crace and we have between 5 to 20 drones an hour passing over our property an hour during the day.

We have a sound insulated, double glazed house and the drones are still loud enough to hear over the top of television, dishwasher and send our dogs crazy.

Couple with the fact that we have Drones with cameras passing over our backyard over 100 times a day.

This is a huge breach of privacy, we literally have no privacy in our backyard now due to these things constantly flying overhead.

These things need to stop.

Kind Regards,

Tim Finn
