

How the National Heavy Vehicle Charging Pilot on-road trial works

Data from up to 100 operators and over 1000 vehicles Australia wide

Data collected

WEIGHT (TONNES)
 FUEL
DISTANCE/LOCATION

Data analysed

Measures road use data based on distance, weight and location

Mock invoice generated

Compares fuel and registration charges with road use charges based on distance, weight and location

Benefits to participants

- Participants receive data on their fleet
- No cost to participants
- Telematics devices or hubodometers installed and maintained for the life of the trial
- Your opportunity to help shape the future of heavy vehicle road use charges

Personal and identifying information is removed

Mock invoice provided to business

Data used to shape the future of heavy vehicle road use charges
