The Australian Transport Safety Bureau gratefully acknowledges the provision of police road crash data by the New South Wales Roads and Traffic Authority, Vicroads, Queensland Transport, Department for Transport, Energy and Infrastructure South Australia, Western Australia Police Service, Department of Infrastructure, Energy and Resources Tasmania, Department of Planning and Infrastructure Northern Territory, and Territory and Municipal Services Australian Capital Territory.

Abstract

This publication presents an annual statistical summary of fatal road crashes and road deaths in Australia

This issue presents fatal crash data for 2006 and makes comparisons with 2005 and 2001. The data derive primarily from a fatal crash database compiled each month by the Australian Transport Safety Bureau using fatal crash unit record data forwarded from police and transport authorities in each State and Territory.

Table 30	Deaths by State/Territory and road user – 1982 to 2006
Table 31	Deaths by road user, gender and age, Australia – 1982 to 2006
Table 32	Deaths by month – Australia 1991 to 2006

1. MAIN FINDINGS

Long term trend in deaths

- While there is evidence of a long term downward trend in Australian road deaths, the number of deaths per annum has not changed markedly since 2003.

Change in deaths since 2005

- In 2006, there were 1,601 persons killed in 1,456 road crashes. Comparing the number killed with the previous year, this was a 1.6% decrease (1,627 persons killed in 1,472 crashes).
- The pattern of deaths between 2005 and 2006 varied substantially between jurisdictions:
 - decreases occurred in New South Wales (1.6%), Victoria (2.6%), South Australia (20.9%), Northern Territory (23.6%) and the Australian Capital Territory (50%)
 - increases occurred in Queensland (1.8%), Western Australia (23.9%) and Tasmania (5.9%).
- Among different road user groups :
 - driver deaths decreased by 1.7%, which followed a 1.8% increase the previous year
 - passenger deaths decreased 3.7% after a 3.6% decrease the previous year
 - pedestrian deaths increased 0.9% following a 2.3% increase the previous year
 - motorcyclist deaths increased by 1.7% after a 19.4% increase the previous year
 - cyclist deaths decreased by one, following a decrease of two deaths between 2004 and 2005.

Five-year trends

- Between 2001 and 2006 there was an average annual decrease of 1.7% in national road deaths.
- The five-year trend differed between males and females. Females showed an average annual decrease of 2.8% compared with an average annual decrease for males of 1.3%.
- The five-year trend varied between jurisdictions:
 - the greatest average annual decrease was observed in Victoria (4.9%) followed by South Australia (4.4%), the Northern Territory (3.6%) and New South Wales (1.7%)
 - the greatest average annual increase occurred in the Australian Capital Territory (4.8%), followed by Western Australia (2.1%), Tasmania (2.0%) and Queensland (0.7%).
- The trend also varied between road user groups:
 - passenger deaths showed the largest average annual decrease of 4.8%
 - pedestrian deaths had an average annual decrease of 4.4%
 - driver deaths had an average annual decrease of 0.3%
 - motorcyclist deaths increased by an average of 1.9% annually
 - cyclist deaths had an average annual increase of 1.1%.

Death rate per 100,000 population

- Between 2005 and 2006 the number of people killed per 100,000 Australian population decreased from 8.0 to 7.8.

Crashes involving articulated trucks and buses

- 2006 data for articulated truck crashes are presently incomplete. However the data that are available indicate an increase in the number of these crashes for 2006 compared with 2005.
- There were 16 fatal crashes involving buses in 2006, and these resulted in 16 deaths. This compares with 27 fatal crashes and 36 deaths recorded the previous year.

2006	Not available at time of publication								

a Population data are from Australian Bureau of Statistics *Population by Sex and Age: States and Territories* (ABS Catalogue No. 3201.0). The population estimates are as at June 30 of each year. Only preliminary data are available for 2006.

b Average annual percentage change based on the exponential trend for the last five 12-month periods.

c Rates are calculated using the 12 month period covered by the Australian Bureau of Statistics *Survey of Motor Vehicle Use* (ABS Cat. No. 9208.0). These data cover the 12 months to 30 September in 1976-1995, to 31 July in 1998-1999 and to 31 October in 2000-2005. Prior to 1995, data shown here for individual States and Territories refer to place of registration of vehicle, and not necessarily the place where vehicle travel was conducted. Due to changes in survey method between 1995 and 1998, rates are not necessarily comparable across this time period. Further changes in survey method undertaken in 2002 and consequent revision by the ABS of already published kilometres travelled estimates have led to revision in the rates given here for the years 1998-2001 from those published in the 2001 edition of this publication.

a Counts of registered motor vehicles obtained for years prior to 1995 are from the Australian Bureau of Statistics *Motor Vehicle Registrations Australia* (ABS Cat. No. 9303.0) and for years 1995 and thereafter from the Australian Bureau of Statistics *Motor Vehicle Census Australia* (ABS Cat. No. 9309.0) except for year 2000 registrations which are linearly interpolated from 1999 and 2001 figures. Note that the census is taken at June 30 for 1980-1994, at May 31 for 1995, at October 31 for 1996-1999 and at March 31 for 2001-2006.

b Average annual percentage change based on the exponential trend for the last five 12-month periods.

Indices for counts of fatal crashes involving buses – Australia 2001 to 2006

Each point shows the number of fatal crashes in preceding 12 months expressed as percentage of the comparable figure at December 2001.

Table 26 Fatal crashes involving buses by State and speed limit at crash site – 1991 to 2006

	NSW	Vic	Qld	SA	WA	Tas	Australia ^a
Low speed zones ^b

2005	1	0	3	0	1	0	5
2006	0	1	0	0	1	0	2

a Includes Northern Territory and Australian Capital Territory, not separately shown.

b Low speed zones have speed limits of less than 100 km/h. High speed zones have speed limits of 100 km/h or more, including unrestricted zones.

Table 27 Summary of fatal bus crashes: speed limit, time of day, crash type and time of week – Australia 2006

	Speed limit at crash site (km/h)			Time of day		All fatal crashes ^c
	Up to 60	65-95	100+ ^a	Day	Night ^b	
No.	13	1	2	11	5	16
%	81.3	6.3	12.5	68.8	31.3	100.0
	Crash type			Time of week		All fatal crashes ^c
	Pedestrian crash	Other single vehicle crash	Multiple vehicle crash	Week day	Week-end ^d	
No.	7	2	7	12	4	16
%	43.8	12.5	43.8	75.0	25.0	100.0

a Includes zones of unrestricted speed.

b 6:00 pm to 5:59 am all days.

c Includes crashes of unstated speed limit, time of day, crash type or time of week.

d 6:00 pm Friday to 5:59 am Monday.

Note: percentages shown here are derived as percentages of total cases excluding those with missing values.

Table 28 Fatal crashes involving buses by speed limit at site and crash type – Australia 2006

Type of fatal articulated truck crash	Speed limit at crash site (km/h)			All fatal crashes ^a
	Up to 60	65-95	100+	
Pedestrian crashes	0	0	2	2
Other single vehicle crashes	6	1	0	7
Multiple vehicle crashes	7	0	0	7
All bus crashes	13	1	2	16

a Includes crashes of unstated speed limit.

5. TIME SERIES

FATAL CRASHES

Indices for counts of fatal crashes in each State and Territory – 2001 to 2006

Each point shows the number of fatal crashes in preceding 12 months expressed as percentage of comparable figure at December 2001.
