ROAD DEATHS AUSTRALIA : 2007 STATISTICAL SUMMARY

Prepared and published by

Road Safety
Infrastructure and Surface Transport Policy
Department of Infrastructure, Transport, Regional
Development and Local Government.

Reference No.

July 2008/Infrastructure 08133

Abstract

This annual publication presents a statistical summary of Australian fatal road crashes and road deaths. The current issue presents fatal crash data for 2007 and makes comparisons with earlier years.

Notes

(1)

The data derive primarily from the Monthly Fatal Crash Database compiled by the Department using fatal crash unit record data forwarded from police and transport authorities in each State and Territory. This database covers all fatal road crashes from 1989. For each crash, it records the State/Territory, date, time of day, speed limit at crash site and number of vehicles involved. For each person killed, gender, age and road user classification is recorded. Also recorded is whether or not a bus, articulated truck or heavy rigid truck was involved. Australian Bureau of Statistics data on population, vehicle registrations and motor vehicle usage were used for deriving road death rates. The monthly updates of this database affect the current month and also occasionally amend data for earlier months. Because of this, minor discrepancies will occur when comparing data from publications with different dates.

(2)

The police road crash data presented here represent a selection of that held by the Department. Additional data can be obtained from the address above. Readers are also referred to the publication *Road Fatalities Australia, Monthly Bulletin* for dates up to and including September 2004 and *Road Deaths Australia, Monthly Bulletin* for dates from October 2004.

ACKNOWLEDGEMENTS

The Department of Infrastructure, Transport, Regional Development and Local Government gratefully acknowledges the provision of police road crash data by the New South Wales Roads and Traffic Authority, Vicroads, Queensland Transport, Department for Transport, Energy and Infrastructure South Australia, Western Australian Police Service, Department of Infrastructure, Energy and Resources Tasmania, Department of Planning and Infrastructure Northern Territory, and Territory and Municipal Services Australian Capital Territory.

Table 32	Deaths by month – Australia 1992 to 2007

1. MAIN FINDINGS

Long term trend in deaths

- While there is evidence of a long term downward trend in Australian road deaths, the number of deaths per annum has not changed markedly since 2003.

Change in deaths since 2006

- In 2007, there were 1,616 persons killed in 1,466 road crashes. Compared with 2006, this was a 1.1 per cent increase in deaths and a 0.9 per cent increase in fatal crashes.
- The pattern of change varied substantially between jurisdictions. Fatality numbers:
 - Decreased in Tasmania (14.5 per cent), NSW (9.9 per cent) and Victoria (0.9 per cent).
 - Increased in the Northern Territory (33.3 per cent), Western Australia (15.8 per cent), the ACT (7.7 per cent), Queensland (7.2 per cent) and South Australia (6.0 per cent).
- Among different road user groups :
 - Driver deaths increased by 4.9 per cent.
 - Passenger deaths increased 1.5 per cent.
 - Pedestrian deaths decreased 11.5 per cent.
 - Motorcyclist deaths stayed constant.
 - Cyclist deaths increased by two deaths.

Five year trends

- Between 2002 and 2007, road deaths decreased by an average annual rate of 0.9 per cent. The average annual decrease for females was 2.5 per cent, and for males 0.3 per cent.
- Estimated five year trends varied across jurisdictions:
 - The largest average annual *decrease* was in South Australia (5.3 per cent), followed by NSW (3.9 per cent), Victoria (2.2 per cent) and the Northern Territory (0.4 per cent).
 - The largest average annual *increase* was in the ACT (9.7 per cent), followed by Tasmania (5.7 per cent), Western Australia (4.8 per cent) and Queensland (2.4 per cent).
- Five year trends also varied across road user groups:
 - Passenger deaths decreased by an annual average rate of 5.1 per cent.
 - Pedestrian deaths decreased by an annual average rate of 3.1 per cent.
 - Driver deaths increased by an annual average of rate 0.4 per cent.
 - Motorcyclist deaths increased by an annual average rate of 3.6 per cent.
 - Cyclist deaths increased by an annual average rate of 6.2 per cent.

Rates of road deaths per population

- The rate of road crash deaths per population during 2007 was 7.7 deaths per 100,000 population. This is the same as the rate during 2006.

Crashes involving articulated trucks and buses

- In 2007 there were 142 fatal crashes involving articulated trucks and these resulted in 172 deaths. This compares with 144 fatal crashes and 168 deaths recorded the previous year.
- There were 23 fatal crashes involving buses in 2007 and these resulted in 23 deaths. During the previous year, there were 18 fatal crashes and 18 deaths.

2007	Not available at time of publication								

^a Population data are from Australian Bureau of Statistics *Population by Sex and Age: States and Territories* (ABS Catalogue No. 3201.0). The population estimates are as at June 30 of each year. Only preliminary data are available for 2007.

^b Average annual percentage change based on the exponential trend for the last five 12-month periods.

^c Rates are calculated using the 12 month period covered by the Australian Bureau of Statistics *Survey of Motor Vehicle Use* (ABS Cat. No. 9208.0). These data cover the 12 months to 30 September in 1976-1995, to 31 July in 1998-1999 and to 31 October in 2000-2005. Prior to 1995, data shown here for individual States and Territories refer to place of registration of vehicle, and not necessarily the place where vehicle travel was conducted. Due to changes in survey method between 1995 and 1998, rates are not necessarily comparable across this time period. Further changes in survey method undertaken in 2002 and consequent revision by the ABS of already published kilometres travelled estimates have led to revision in the rates given here for the years 1998-2001 from those published in the 2001 edition of this publication.

a Counts of registered motor vehicles obtained for years prior to 1995 are from the Australian Bureau of Statistics *Motor Vehicle Registrations Australia* (ABS Cat. No. 9303.0) and for years 1995 and thereafter from the Australian Bureau of Statistics *Motor Vehicle Census Australia* (ABS Cat. No. 9309.0) except for year 2000 registrations which are linearly interpolated from 1999 and 2001 figures. Note that the census is taken at June 30 for 1980-1994, at May 31 for 1995, at October 31 for 1996-1999 and at March 31 for 2001-2007.

b Average annual percentage change based on the exponential trend for the last five 12-month periods.

2006	0	2	0	0	1	0	3
2007	2	2	1	1	0	0	6

a Includes Northern Territory (not shown) but excludes the Australian Capital Territory.

b Low speed zones have speed limits of less than 100 km/h. High speed zones have speed limits of 100 km/h or more, including unrestricted zones.

Table 27 Summary of fatal bus crashes: speed limit, time of day, crash type and time of week – Australia 2007

	Speed limit at crash site (km/h)			Time of day		All fatal crashes ^c
	Up to 60	65-95	100+ ^a	Day	Night ^b	
No.	12	5	6	14	9	23
%	52.2	21.7	26.1	60.9	39.1	100.0
	Crash type			Time of week		All fatal crashes ^c
	Pedestrian crash	Other single vehicle crash	Multiple vehicle crash	Week day	Week-end ^d	
No.	7	1	15	18	5	23
%	30.4	4.3	65.2	78.3	21.7	100.0

a Includes zones of unrestricted speed.

b 6:00 pm to 5:59 am all days.

c Includes crashes of unstated speed limit, time of day, crash type or time of week.

d 6:00 pm Friday to 5:59 am Monday.

Note: percentages shown here are derived as percentages of total cases excluding those with missing values.

Table 28 Fatal crashes involving buses by speed limit at site and crash type – Australia 2007

Type of fatal bus	Speed limit at crash site (km/h)			All fatal crashes ^a
	Up to 60	65-95	100+	
<i>truck crash</i>				
Pedestrian crashes	5	0	2	7
Other single vehicle crashes	0	0	1	1
Multiple vehicle crashes	7	5	3	15
All bus crashes	12	5	6	23

a Includes crashes of unstated speed limit.

5. TIME SERIES

FATAL CRASHES

Indices for counts of fatal crashes in each State and Territory – 2002 to 2007

Each point shows the number of fatal crashes in preceding 12 months expressed as percentage of comparable figure at December 2002.

Table 29 Fatal crashes by State/Territory – 1983 to 2007
