Services and Regulation section

I would like three commercial television station to broadcast there main channel in HD and 5.1 sound. This can be done in a number of ways first get rid of the data home shopping channels it's a waist of bandwidth. Second make there HD channel SD and Simplecast the main channel in HD or you can make there main channel HD and the other 2 channels SD every one should have a HD TV or HD setop box by now.

Kind regards Keith Strickland

I would like three commercial television stations to broadcast their main channel in HD and 5.1 sound. This can be done in a number of ways first get rid of the data home shopping channels it's a waste of bandwidth. Second make their HD channel SD and Simplecast the main channel in HD or you can make their main channel HD and the other 2 channels SD everyone should have a HD TV or HD setop box by now. For example channel seven would look like this channel their main channel 7 would be HD and 70 would be a simplecast of channel 7 in SD. Seven two and mate would be SD.

Kind regards Keith Strickland
