We already have PEGI and ESRB to rate video games.

But Australians (not aboriginals bec they are not gamers and they never will be)

do NOT want to waste tax payer money on greedy duopoly PEGI and ESRB.

An alternative is needed:

- Zero government oversight (no tax payer money wasted paying people to roll dice on a game to give it an age rating *rolls* 🎲)
- Koala and kangaroos and crocodiles will classify content, in other words: **WE THE GAMERS**

- **21+** Age rating is desperately needed. Currently only United Arab Emirates (UAE) are using it, PEGI and ESRB refuse to add it despite upcoming games MANHUNT 3 will be so much better than the disgustingly dull, toothless and boring GTA franchise, the future is more neckbreaking violence and discrimination, NOT LESS!! **18+** is NOT adult, it is TEEN, A TEENAGER. I'm not a teen, I don't play GTA GARBAGE, I am developing **21+** rated game where you kill N*****, j*** and tots because that is the unstoppable future of violent video games ♥
