2018 Regional Telecommunications Review

The Telstra Mobile service in Pottsville NSW 2489 is of a poor standard.

It is extremely difficult to make or receive a call inside the house, the other party complaining that they can't hear us, or that we are breaking up. We then have to go outside to converse.

It is usually easier just to go outside first to make a call.

We are not remote.

We are in an estate in town, in Pottsville NSW

We pay for this service.

This is an unsatisfactory service to give in 2018.
