Dear Sir,

I live in a complex of 25 units.

I am in my late 70's and live alone, so having mobile phone reception is very important to me.

The mobile phone reception in my area is very, very poor, & more often non existent.

My internet Provider is Optus

I am currently able to use my mobile phone by linking it with my modem, using wi fi

However, if there is an internet failure, I am left with nothing, or have to walk 500m along the road to get any reception.

If I have visitors, or tradesmen working, they get no reception.

In the main area of Buderim, just 1 Km away, it is possible to get 5 bars on the phone !!

if you would take action on my behalf I would appreciated it very much

Meg White
