Mercedes-Benz Australia/Pacific (MBAuP) appreciates the opportunity to respond to the Federal Government's Vehicle Emissions Issues Paper. We ask for you to accept this late response, as we are committed to assisting in the national effort to reduce vehicle emissions.

The Federal Chamber of Automotive Industries (FCAI) Response to the Vehicle Emissions Discussion Paper was prepared with input and support from MBAuP.

MBAuP supports the approach and proposals made by FCAI in their paper titled "FCAI Response to Vehicle Emissions Discussion Paper 8 April 16" which is aimed towards achieving a real and sustained reduction in vehicle emissions. These proposals include an integrated approach that takes a whole-of-government approach to CO2 standards, vehicle pollutant emission standards, fuel quality standards and on-road vehicle operation.
