CIRCULAR 35/00 3-1

INTERPRETATIONS

Interpretation No. 1 (Clause 35.2.2.2)

Question: Does a foot operated parking brake where the parking brake release control lever is flush or recessed relative to its mounting surface in the "Brake On" position meet the requirement that the possibility for inadvertent release is minimised, even though it does not provide for two separate and distinct movements in order to disengage the brake?

Answer: Yes.
